

# Edward and the Pirates

## by David McPhail

### Activities

- Take your students on a [virtual treasure hunt!](#) Students must solve a variety of clues and follow directions to reach the treasure.
- Take a high seas adventure with pirates at this [National Geographic Kids website!](#) The interactive site requires students to select the pirate, the ship, and the booty!
- Students will use their problem-solving skills to divide the treasure in [How Do Pirates Divide the Gold?](#)
- Students can use pattern blocks to show fractions and their algebraic equations with [Fraction Action](#).
- Students can practice their directional and problem-solving skills as they maneuver their way through the treasure map in **Neighborhood Map Machine**. Have students open the program, click on Solve a Mystery, then select Treasure.nm. Students use the compass rose to follow the clues. There is also a Ghost hunt perfect for Halloween!
- Students can develop their map-making and map-reading skills by designing and solving treasure hunts. Click [here](#) for directions to create a Treasure Hunt activity.
