

A Snowman Named Just Bob By Mark Kimball

Activities

- In the story, *A Snowman Named Just Bob* by Mark Kimball, "there fell the first exquisite, tiny flake--", describes the beginning of the snowstorm that brought Bob. Check the website, SnowCrystals.com, to find everything you ever wanted to know about snowflakes and snow crystals! It even includes directions for growing your own snowflakes!
- While completing this [Snowmen Webquest](#), students will create a cyber-snowman and write a story about his adventure!
- *Snowflake Bentley* is a biographical account of a scientist who photographed thousands of snowflakes in order to study their unique formations. Share the book with your students, then click [here](#) to see the actual photographs of snowflakes taken by Wilson Bentley. The snowflakes can be enlarged by clicking on them. Have each student select one of the snowflakes and then use a chart to identify ways each are the same or different.
- At the [Make-a-Flake website](#), students can create their own snowflake without scissors! Challenge older students to duplicate the snowflake they examined in the Snowflake Bentley activity above!
- Students can use KidPix to create a snow folk! Get inspiration from this [web link!](#) The students were challenged to create a snow folk that represented a community occupation.
- Can your students make it snow on a sunny day in Georgia? They can if they manipulate the temperature and humidity the right way at [Scholastic's Weather Maker!](#)
